Bridge Gem (v3.0.24) Release Notes

2026-02-04   v3.0.24

New Features

1. Auto-minimised Bridgemate Control Program after Round 1
2. Auto-maximised Bridge Gem after Round 1
3. Depreciated 'Resume' Event option
4. Added 'Restore' Event option to recover Results after Bridge Gem crash
5. Added 'Relaunch' Event option to recover Results after Bridgemate crash
6. Incrementally save *.evnt file to disk in order to support (4) and (5) above
7. Added user guide '**Recovering Results after System Crashes**'

Bug Fixes

1. Minor bugs fixed

Release v3.0.24 supports the recovery of Results after either Bridge Gem or the Results Reporting app, often the Bridgemate Control System, has failed or hung.

Probably the most common cause of this will be due to a flat PC battery.

Other noticable changes are that the Results window automatically maximises when the first result of the 2nd Round is received.
