

Movement Cards

Bridge Gem can print Movement Cards for any of the Movements that it supports.

Movement Cards are produced 9 to a page in a 3 x 3 matrix. The page can be printed or saved as an **Html** file which can subsequently be read and printed by any web-browser (eg Google Chrome, Microsoft Edge, Firefox etc).

To access the Movement Card facility, start an Event and select the Movement. See the user guide, [Running an Event](#), for how to do this.

After selecting the Movement click on the **View/Edit** button.

The **View Movement** form is displayed.

Click on the **Movement Cards** item in its menu bar. A new window is displayed with the Movement Cards for the Movement displayed in a 3 x 3 matrix.

If your computer has a printer installed, click the **Print** button to print directly to the printer.

If your computer does not have a printer installed, click the **Save** button to save the Movement Cards as an **.html** file. The Windows' standard **Save File Dialogbox** is displayed which allows you to save the **.html** file anywhere you want.

The **.html** file can subsequently be emailed, copied etc to a computer that has a printer, and printed by opening the file in a web-browser, eg Google Chrome, Microsoft Edge or Firefox, and printing from the browser.
